PROFESSIONAL SUMMARY

Full Stack Software Engineer with hands-on experience building web applications using React, JavaScript/TypeScript, Node.js, Express.js, and MongoDB. Experienced in RESTful API integration, authentication and role-based access control, payment and subscription workflows, and cloud-integrated applications. Contributed to a legal-tech platform and a role-based marketplace, with exposure to Azure services, Docker, and CI/CD pipelines.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, C#
Frontend: React.js, Redux Toolkit, React Query, React Router, Tailwind CSS, Material UI, Chart.js
Backend & APIs: Node.js, Express.js, ASP.NET Core Web API, RESTful APIs
Databases & Data Access: MongoDB, MySQL, SQL Server, Mongoose, Entity Framework Core
Security: JWT, OAuth 2.0, role-based access control (RBAC), bcrypt
Cloud & DevOps: Azure Cosmos DB, Azure Blob Storage, Azure Container Apps, Docker, Azure DevOps CI/CD

EXPERIENCE & PROJECTS

Full Stack Intern | CMIT Internship – Digifloat *[July 2026 – Dec 2026] | 5 months*

LawGPT | Legal Research & Case Management Platform

- Developed React/Redux frontend functionality for a legal-tech platform supporting AI-assisted legal research, document drafting, document chat, contract analysis, and case management.
- Integrated frontend features with Node.js/Express APIs, including protected module access, document/PDF tooling, and JWT/OAuth authentication workflows.
- Developed billing features covering subscription tiers, credit deduction logic, card payments, and custom PSID payment workflows.
- Worked with Azure Cosmos DB and Azure Blob Storage integrations; supported Docker-based deployment to Azure Container Apps through Azure DevOps CI/CD pipelines.

Web Development Trainee | Qalam Training Program *[Feb 2026 – July 2026] | 6 months*

Event Orbit | MERN Stack Wedding Services Marketplace

- Built a full-stack wedding-vendor marketplace with separate customer, vendor, and administrator portals using React, Express, MongoDB, and Node.js.
- Implemented JWT authentication, bcrypt password hashing, password-reset emails, and role-based access control across protected routes and APIs.
- Developed service search/filtering, booking requests, availability tracking, reviews, wishlists, vendor service management, and admin analytics.
- Integrated Cloudinary, Multer, and Sharp to securely upload, resize, optimize, and serve service/gallery images.
- Created responsive dashboards with reusable React components, React Router, Tailwind CSS, Recharts, React Calendar, and Leaflet maps.

Final Year Project | GC Women University, Sialkot *2024*

PronouncerPro — Pronunciation Learning Web Application

- Developed a full-stack application using React/Vite, ASP.NET Core Web API, Entity Framework Core, and SQL Server.
- Integrated browser-based speech recognition and text-to-speech playback for interactive pronunciation practice; implemented vocabulary retention, mispronunciation tracking, re-practice, and learner/admin progress dashboards.

EDUCATION

Bachelor of Science in Computer Science | GC Women University, Sialkot | CGPA: 3.313 2020 - 2024
